Professional Experience

NextCompany

Brazil

Junior Software Developer

Jan 2025 – Present

- Contributed to the development and evolution of a cloud-based corporate CRM (wCRM), deployed using Docker, and actively participated in the transition to wCompany 2.0, designed with a microservices architecture where each business routine was implemented as an independent service, improving scalability and maintainability.
- Developed and maintained backend microservices using NestJS and Java (Spring Boot), structured with SOLID principles and Clean Architecture, integrated through REST APIs and asynchronous messaging with Kafka, while leveraging Redis for caching, performance optimization, and database load reduction.
- Collaborated within Agile teams (Scrum and Kanban) on frontend development using TypeScript, React, and Angular, as well as data modeling and creation of advanced SQL queries in PostgreSQL with Prisma ORM for operational, analytical, financial, and management reports, including integration with MongoDB for fiscal data storage.

Comunicare Solutions

Brazil

Mobile and Backend Developer

Jan 2021 – Feb 2022

- Developed a cross-platform mobile application using Flutter to support therapy for patients with speech apraxia, focusing on accessibility, usability, and functional validation with healthcare professionals.
- Implemented backend services in Python to enable data integration, information processing, and reliable communication between systems.
- Integrated speech recognition models using Kaldi in a Linux (Ubuntu) environment through shell-based execution, supporting vocal analysis with spectrogram generation in collaboration with speech therapists.

Projects and Leadership

Expressa+ Project

Brazil

Mobile Developer — Technical Leadership

May 2025 – Dec 2025

- Development of an Android application in Flutter focused on accessibility for children with special needs, including autism spectrum disorder.
- Acted as both developer and technical lead, organizing tasks and monitoring deliveries using Agile methodologies.
- Worked closely with psychologists to validate functionality, usability, and therapeutic alignment.

Education

UNINASSAU

Brazil

Associate Degree in Systems Analysis and Development

Jan 2023 – Jan 2025

- Conducted academic research on **Artificial Intelligence models**, focusing on core concepts of *Machine Learning* and *Deep Learning*, including supervised and unsupervised learning techniques.
- Studied, implemented, and compared different AI model architectures such as *regression models*, *decision trees*, *artificial neural networks*, and introductory concepts of *Transformer-based models*, analyzing performance.

UNINASSAU

Brazil

Postgraduate Program in Artificial Intelligence

Jun 2025 – Present

Federal Institute of Piauí (IFPI)

Brazil

Technical Degree in Information Technology

Jan 2020 – Dec 2022

Skills

- Frontend:** TypeScript, React, React Native, Angular, Flutter, Tailwind CSS, ShadCN UI, PrimeNG, PrimeFlex
- Backend:** NestJS, Node.js, Java (Spring Boot), Python, PHP, JavaScript
- Databases:** PostgreSQL, MySQL, MongoDB, Prisma ORM
- Architecture & Integrations:** Microservices, REST APIs, Asynchronous Communication, SOLID, Clean Architecture
- Messaging & Caching:** Kafka, Redis
- DevOps & Tools:** Git, Docker, Docker Compose, Firebase, Linux, L^AT_EX
- Methodologies:** Agile (Scrum, Kanban)
- Languages:** Portuguese (Fluent), English (Advanced), Spanish (Intermediate)

Courses and Certifications

- Mobile Development with Flutter (Alura)
- Backend Architecture with NestJS (Alura)
- Java and Spring Boot for REST APIs (Alura)
